It is understood that this pax specifically requests the ramp. It became clear that no staff were available to operate the ramp. After 5 mins staff arrived and ramp was used.Passenger was lifted off at SY Y without incident.Gate staff noted that two pax were wheelchair bound (1xWCHS 1x WCHR) only one "commented" on pax manifest.

Now no longer able to search by CREW or by AIRCRAFT so all sectors must be identified amnd printed separately - that plus 2 changes of toner cartridge to find one that worked meant that it took 35mins to get plogs,weather and notams.

As door closed pax complained that she "was going to faint" and had to step outside. Cancelled start, opened door. Pax then stated that she "just had to go into terminal for a moment to feel better" Captain suggested that she was welcome to off load herself and the plane would depart. Pax then stated that she felt a lot better. Pax reboarded, flight departed. Pax stated at various points in flight that she "was going to faint". CC seated her near front and kept an eye on her. Pax disembarked with a jaunty step and a happy grin.
